2. Suggestions by students/alumni

- Practical approach of explaining subjects should be followed. Route learning should be discontinued. Field visits to industries and organisations should be organised.
- I would like if some more innovative ways can be experimented such that students enjoy and become more inquisitive about their lab experiment. In software-based laboratory session, unique experiments can be incorporated so that each student gets to learn on his own and plagiarism can be avoided.
- Additional subjects- Electronics in Automobiles/Introduction to Electric vehicles.
- Leadership and soft skill development is a must, these skills help people upskill and make lasting impressions in any industry. Focus should also be levied on group speaking and group-based activities.

Parent's Opinion:

Activities/Subject which are more oriented to current developing technologies can be added.
